1 Introduction

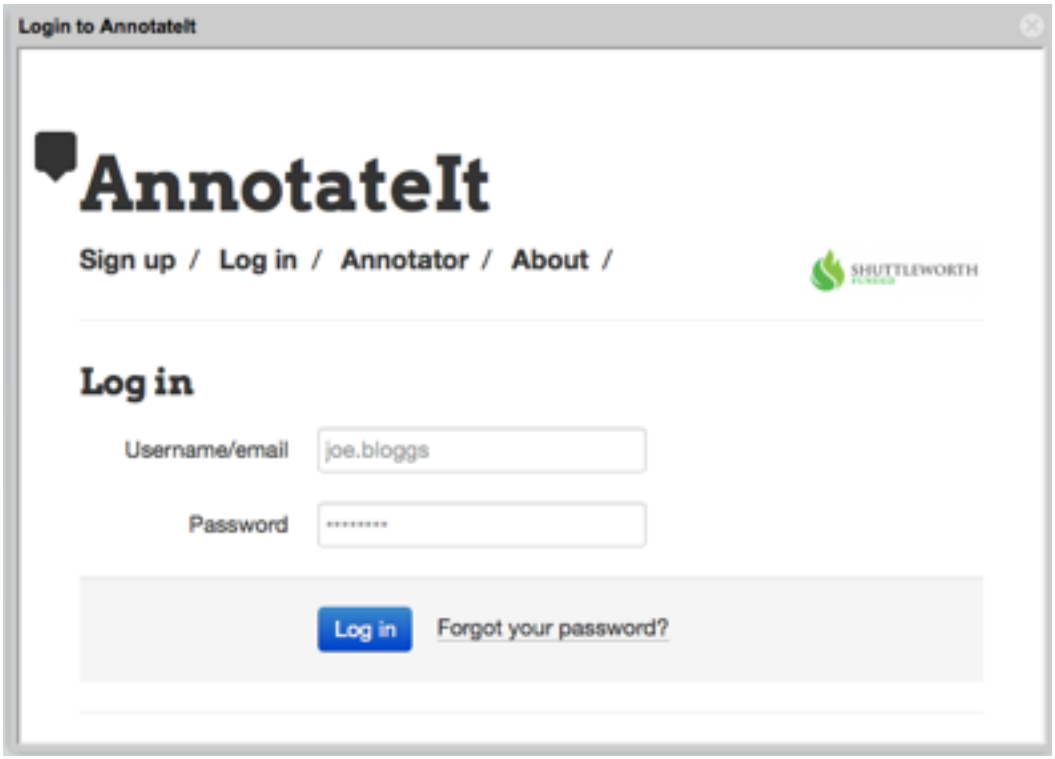
For annotate the text-based views a plugin AnnotatorJS (http://annotatorjs.org) is used in Edirom-Online. The AnnotatorJS is an open-source JavaScript library and tool with backend implementation AnnotateIt, that can be added to any webpage to make it annotatable (http://annotateit.org/).

2 Login/Logout Dialog

Start with selection the annotations button on toolbar.

2.1 Login

Login or sign up for first time on opened home page for AnnotateIt.



If any views was opened and login was successful. All text based views will be refreshed and annotations will be shown. An info-window shows which views will be refreshed.

If login was fail. It will be shown with an info-message from AnnotateIt.

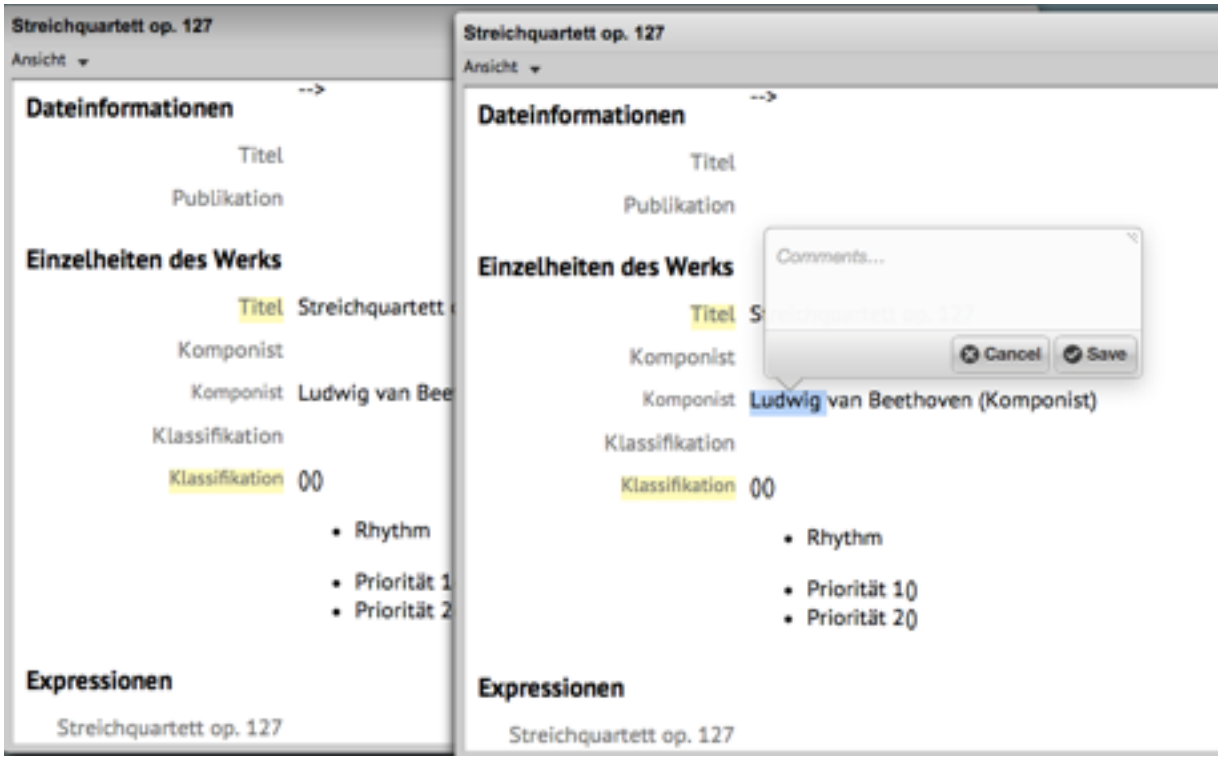
2.2 Logout

Logout from AnnotateIt: opened text based views will be refreshed and user annotations will be disabled.

3 Views with Annotations

The annotatable views are Summary-, Metadaten-, Text- and TextFacsimile-View.

For create a new annotation: double click of word or more words. Text, that will be annotated, is marked with blue color and a tooltip window for writing comments is opened.



Annotated texts are marked with yellow color.

After user action, if more same views are opened, these views will be refreshed automatically.
